Comprehensive Care From A Single Trusted Plan

Our plan matches each member with a clinical care provider, such as a nurse practitioner or physician assistant, who will work with you in addition to your primary care physician (PCP).

The clinical care provider is responsible for overseeing, facilitating, and coordinating your health care needs and performing routine and as-needed physical examinations, depending on your health care status.

Your clinical care provider will work closely with your PCP and your nursing home staff to develop an individualized care plan to ensure your specific health care needs are met. The clinical care provider will promote collaboration among your physicians, family, and the Nascentia Skilled Nursing Facility insurance plan.
